## INTERNATIONAL PRELIMINARY EXAMINATION

International application No.

PCT/KR2002/001782

**V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement****1. Statement**

Novelty (N)	Claims 1-17	YES
	Claims	NO
Inventive step (IS)	Claims	YES
	Claims 1-17	NO
Industrial applicability (IA)	Claims 1-17	YES
	Claims	NO

**2. Citations and explanations (Rule 70.7)**

Reference is made to the following documents :

D1 : KR 10-1999-79365 A

D2 : KR 10-2000-11230 A

**Novelty**

The invention as defined in the claims is a liquid crystal display which includes a first cutout pattern and a second cutout pattern wherein width of the domains is equal to or less than 30 microns.

None of the cited prior art describes LCD which have cutout patterns where the width of the domains is equal to or less than 30 microns.

Therefore claims 1-17 fulfill the requirements of Article 33(2) PCT.

**Inventive Step**

D1 describes a multi-domain VA-LCD wherein pixel electrode and common electrode are partitioned using partitioning members. The pixel electrode and common electrode respectively have slit patterns for partitioning.

D2 describes a multi-domain LCD wherein the pixel electrode is partitioned by forming slit cutout pattern.

The inventive step of claims 1-17 seems to rely on the upper and lower substrates which have domain partitioning members respectively. But in D1, both common electrode and pixel electrode have domain partitioning members. In D2, slit patterns are used for domain partitioning.

The above citations when combined as would be obvious to a person skilled in the art, disclose all of the features of the claims.

Therefore claims 1-17 do not fulfill the requirements of Article 33(3) PCT.

**Industrial Applicability**

Claims 1-17 fulfill the requirements of Article 33(4) PCT.
